Qlight

Qlight

Gives you a
Brighter
Future

Qlight Gives You a Brighter Future!

Qlight has been contributed to an industrial safety and efficiency by producing several audible/ visual signaling devices and industrial LED lights since its establishment in 1986. Our technology and quality are highly reputable among various industries for example semiconductor manufacturing equipment, automobile industry, unmanned automation facility, steel production facility, shipbuilding industry, offshore plant, specialized unit for petrochemical industry based on diverse technology patents and core technologies such as LED light source, heat radiation technology, explosion proof design. Our established local corporations in South Korea and China, sales branches in the United States, Japan, Vietnam, and a global service network provides a distribution and sales system servicing over 80 countries that help Qlight reinforces industrial fields all over the world.

Qlight is a representative of signaling device in Korea.

Qlight has been striving to accomplish our mission to provide visual and audible status indicating systems and solutions to enhance our customer's work safety and efficiency for the last three decades.
As a market leader, Qlight is going to accomplish our responsibility by introducing state of the art equipment and unmanned facilities.

1986 - 1995

Business foundation and consolidation

- 1986 Established Qlight
- 1993 Nominated for developing domestic explosion proof warning lights by Korean Ministry of Science & Technology

1996 - 2005

Growing as a s signaling device specialist

- 2001 Established Shanghai Qlight Electronic Co., Ltd. in China

- 2004 ISO 9001:2000 certificates acquired

2006 - 2017

A great leap forward & business reconstruction

- 2010 Established R&D Center
- 2011 Selected as a venture company
- 2011 Selected as an INNO-BIZ firm which is an innovative tech company
- 2014 Selected as a promising export company by Small and Medium Business Administration(SMBA)
- 2014 Established the Qlight USA, Inc. in San Jose, CA.
- 2016 The second Gimhae factory built

History of Change & Innovation

2018 to Present

New engines for growth

2019 Established Qidong factory

2019 Selected as a family friendly
company by Ministry of
Gender Equality and Family

2020 Selected as a small giants
company by Small and
Medium Business
Administration(SMBA)

2021 Selected as a youth-friendly
small giants company

2023 Selected as the best reading
management company
by the Ministry of Culture,
Sports and Tourism of Korea

The 2nd growth and globalization

Qlight, the best professional company

Leading the **improvement of industrial efficiency**

1 Aiming for the first-class

Aiming for the first-class specialized company to contribute industrial efficiency and safety of customer based on the core competency of System, Variety, and Hi-quality

40 Continuous growth for about 40 years

Based on a partnership-oriented corporate culture and sharing management, we have grown continuously for 40 years since our founding and are recognized for our quality and technology.

80 Global networks in 80 countries

Exporting to all over the world through global network spanning over 200 distribution channels in 80 countries and brightening industrial sites around the world

450 Multi-variety production

Satisfying various needs of customers through systematic customer-customized production system for over 450 products

Quick

Prompt customer satisfaction and real time enterprise(RTE)

Quality

Emphasis on product and service quality, workplace innovation and ethical management

Question

Problem oriented thinking and creative problem solving are based on achieving strategic task.

Qualified

The most suitable company that leads the innovation of signaling device technology and industrial efficiency improvement

Core Competency

System

Delicate mechanism of the work realizes shorter lead time by effectively managing over-all procedures such as purchasing, production, stock management, and distribution.

Broad-line

Customers are highly satisfied with Qlight products because we offer over 450 types of wide variety of product family with a systematic customized production system.

Supreme Quality

Qlight's technological capability and supremacy of quality are being recognized because of our strict technology standard and inspection system. We've obtained over 22 certificates such as IECEx, ATEX, NEPSI, CCS, CE, and UL. We've been expanding it in accordance with industrial demands.

How Qlight works

Waterproof and Dustproof Protection Structure

Comparing waterproof & dustproof protection structure

IP rating _ Known as "Ingress Protection rating" indicated in two-digit code showing the amount of protection against solid and the liquid(IEC60529)

IP 6 7

First Number		Second Number			
Protection against solid		Protection against liquid			
0		No protection	0		No protection
1		Protected against solid objects over 50mm, eg accidental touch by persons hands	1		Protection against vertically falling drops of water eg condensation
2		Protected against solid objects over 125mm, eg persons fingers	2		Protection against direct sprays of water up to 15° from the vertical
3		Protected against solid objects over 25mm (tools and wires)	3		Protected against direct sprays of water up to 60° from the vertical
4		Protected against solid objects over 1mm (tools, wires, and small wires)	4		Protection against water sprayed from all directions - limited ingress permitted
5		Protected against dust limited ingress (no harmful deposit)	5		Protected against low pressure jets of water from all directions - limited ingress
6		Totally protected against dust	6		Protected against temporary flooding of water, eg for use on ship decks - limited ingress permitted
		7		Protected against the effect of immersion between 15 cm and 1 m	
		8		Protects against long periods of immersion under pressure	

NEMA SIZE

National Electrical Manufacturers Associations standard for enclosure protection rating, NEMA1-6 and 11-13 type is applicable in Non-Hazardous Locations, NEMA 7-10 is applicable in Hazardous Locations

Type	Usage place	Environment	Protection rating
1	Indoor Use	Non-explosion proof	Intended for indoor use primarily to provide a degree of protection against limited amounts of falling dirt
2	Indoor Use	Non-explosion proof	Intended for indoor use primarily to provide a degree of protection against limited amounts of falling water and dirt
3	Outdoor Use	Non-explosion proof	Intended for outdoor use primarily to provide a degree of protection against rain, sleet, windblown dust; and damage from external ice formation
3R	Outdoor Use	Non-explosion proof	Intended for outdoor use primarily to provide a degree of protection against rain, sleet; and damage from external ice formation, and must have a drain hole
3S	Outdoor Use	Non-explosion proof	Intended for outdoor use primarily to provide a degree of protection against rain, sleet, windblown dust; and to provide for operation of external mechanisms when ice laden
4	Indoor/Outdoor Use	Non-explosion proof	Intended for indoor or outdoor use primarily to provide a degree of protection against windblown dust and rain, splashing water, hose directed water; and damage from external ice formation
4X		Non-explosion proof	Intended for indoor or outdoor use primarily to provide a degree of protection against corrosion, windblown dust and rain, splashing water, hose directed water; and damage from external ice formation
5	Indoor Use	Non-explosion proof	Intended for indoor use primary to provide
6	Indoor/Outdoor Use	Non-explosion proof	Intended for indoor or outdoor use primarily to provide a degree of protection against hose directed water, the entry of water during occasional temporary submersion at a limited depth; and damage from external ice formation
6P		Non-explosion proof	Intended for indoor or outdoor use primarily to provide a degree of protection against hose-directed water, the entry of water during prolonged submersion at a limited depth; and damage from external ice formation
7	Outdoor Use	Explosion proof	Intended for indoor use in locations classified as Class I, Groups A, B, C, or D, as defined in the NEC
8	Indoor/Outdoor Use	Explosion proof	Intended indoor or outdoor use in locations classified as Class I, Groups A, B, C, or D, as defined in the NEC
9	Indoor Use	Explosion proof	Intended for indoor use in locations classified as Class II, Groups E, F, and G, as defined in the NEC
10	Indoor/Outdoor Use	Explosion proof	Are constructed to meet the applicable requirements of the Mine Safety and Health Administration (MSHA)
11	Indoor Use	Non-explosion proof	Protection from the corrosive effects of liquids and gases by oil immersion
12	Indoor Use	Non-explosion proof	Intended for indoor use primarily to provide a degree of protection against circulating dust, falling dirt, and dripping non-corrosive liquids
12K	Indoor Use	Non-explosion proof	Intended knockouts are intended for indoor use primarily to provide a degree of protection against circulating dust, falling dirt, and dripping non corrosive liquids
13	Indoor Use	Non-explosion proof	Intended for indoor use primarily to provide a degree of protection against dust, spraying of water, oil, and non-corrosive coolant

NEMA Ratings and IP Ratings Equivalency Chart

The chart below is for comparison between two enclosure ratings It is only for reference and these two rating standards are not exactly converted

NEMA ENCLOSURE TYPE	IP ENCLOSURE TYPE
1	IP20
2	IP22
3	IP55
4	IP66
4X	IP66
6	IP67
12	IP54
13	IP54

Icon Description

This catalogue helps users quickly identify the product's specifications and features by using several types of icons. If you understand the concept for each icon, you will find it easy to understand the catalogue information.

Light Source and Operating Mode Icons

Icon	Operating Mode	Icon	Operating Mode
	Bulb steady type		Bulb steady/flashing type
	Bulb revolving type		LED revolving type
	LED steady type		LED steady/flashing type
	LED simulated revolving type		LED strobe type
	Xenon lamp strobe type

CIE 1931 Color Space Chart

LED Colors are represented by the CIE 1931 RGB color space and CIE 1931 XYZ color space created by the International Commission on Illumination (CIE in 1931). Color Space Chart is based on the brightness of the color. Green occupies the largest space since it has the largest effect on determining the brightness of colors, while blue color that shows the least effect occupies the smallest area.

The mixing ratio of the brightness of the color is 3: 6: 1 (R: G: B), where the green portion occupies the largest space. White color that is commonly used for work lights is composed of the color green, red, and blue. White color also varies due to the ratio of these three colors. The variation color ratios are referred as the color temperature.

※ Selected daylight blue color for industrial-purpose applications

Color Temperature Unit: K(Kelvin)

The color temperature of a light source is the temperature of an ideal black-housing radiator that radiates light of comparable hue to that light source. The temperature is conventionally stated in units of absolute temperature, known as Kelvin(K).

The black housing radiates red spectrum when it starts to heat up, and will radiate blue light when the temperature gets even higher.

- Before Sunset: 2,200K(Candlelight, incandescent lamp)
- 40minutes after sunset: 3,000K(Warm white fluorescent lamp, high pressure sodium lamp)
- 2 hours after sunset: 4,000K(White halogen fluorescent lamp)
- Sunlight at noon: 5,800K(Daylight fluorescent lamp)
- Cloudy day: 7,000K(Daylight blue, fluorescent mercury lamp)

LED Color Wavelength

No.	Color	Wavelength(mm)
1	Red	618-635
2	Amber	585-595
3	Green	510-530
4	Blue	453-465

LED Color Temperature

No.	Color	Color Temperature(K)
1	incandescent	2,500-3,500
2	warmwhite	3,500-4,500
3	daylight	4,500-5,500
4	cooldaylight	5,500-7,000

LED Light Energy Saving Chart

Understanding of Light Terms

Term Definitions and Stated Unit

Illuminance Unit: lux

Illuminance is the total Luminous flux incident on a surface per unit area which is conventionally stated as a unit of lux. Specifically, 1 lux equals the amount of light that falls on a one-square-meter surface that is one meter away from a single candle with light speed of 1lm.

Luminous Intensity Unit: cd

Luminous intensity is a measure of the wavelength-weighted power emitted by a light source in a particular direction per unit solid angle based on the luminosity function(a standardized model of the sensitivity of the human eye). The standard unit of luminous intensity is the candela.

Luminance Unit: cd/m²

Luminance is a measure of the luminous intensity per unit area of light travelling in a given direction. It describes the amount of light that passes through, emitted or reflected from a particular area, and falls within a given solid angle. The standard unit for luminance is cd(luminance intensity per square meter(cd/m²)).

Luminous Flux Unit: lm

Luminous flux is the measure of the perceived power of light. Standard unit of Luminous flux is the lumen (lm). Usually Luminous flux may be understood as the power of light.

Color Rendering Unit: Ra

A color rendering index (CRI) is a quantitative measure of the ability of a light source to reveal the colors of various objects faithfully in comparison with an ideal or natural light source. Numerically, the highest possible CIE Ra value is 100, which would only be given to a source identical to standardized daylight or a body of black color, and its value drops to negative values for some light sources. The higher the CRI value is, the better the color rendering ability is. Light sources with a CRI of 85 to 90 are considered good at color rendering.

High Color Rendering(Ra80)

Low Color Rendering(Ra70)

Light Distribution Curve

Light distribution curve, provides information on how light is emitted from a lamp or light fixture. The diagram represents a section cut through the fixture and shows the intensity of light emitted in each direction. The portion of the graph above the horizontal 90°-270° line indicates light that shines above the fixture (indirect), while the portion of the graph below represents light shining down (direct). The straight lines radiating from the center point identify the angle of the light emitted while the circles represent the intensity.

QML

QMHL

- Excellent oil resistance with a special sealing structure with IP67 protection rating, suitable for machine tool applications with cutting fluids
- Suitable for high pressure and high temperature water cleaning environment(IP69K)
- Tempered glass prevents damage from machine tool chips
- Flat glass bonding structure
- No external substances on the glass despite of long-term use
- Can select between QML model (Anti-glare type) and QMHL model (High luminance type) depending on your work conditions
- Can select from a variety of bracket options from direct mount, tilt mount, and pan/ tilt mount type to fit your work environment or lighting condition needs
- Wired type and M12 connector type allow for a customized model that M12 connector can be attached at the end of wires.
- Customized oil resistant cable attached type available

Tilt/Pan Type MF Bracket, Water and Oil Resistant

MF type bracket

SIDE VIEW

TOP VIEW

- Water and oil resistant MF type brackets protect output cable from cutting fluid and chips
- Has a tilt adjustment angle of 180° and a pan angle of 160°

K type bracket

SIDE VIEW

- Has tilt adjustment with wide angle of 180°

M12 connector equipped

- Applicable model: QML-150-D, QML-150-K, QML-250-D, QML-250-K, QMHL-150-D, QMHL-150-K, QMHL-250-D, QMHL-250-K

Test Conditions/Regulations

Vibration Resistance Test	· Acceleration: 20m/s² · Duration: 1 octave/min · Range of frequency: 10-150Hz · Amplitude: 10 times maximum 7.5mm, direction: test 10times in 3 directions(X, Y, Z)
Shock Resistance Test	· Acceleration: 20g · Directions: ±X, ±Y, ±Z · Numbers: 3 times each directions · Time period: 11ms for each direction · Waveform: Half sine
Oil Resistance Test	· General test: Tested in water soluble and non-water soluble flooded environments for 500 hours. · High temperature oil resistance test: Place the object in a constant temperature water bath at 80°C for two hours and then submerge the object in the room temperature oil diluent for 24hours.
Solid Particle Protection Test(IP6X)	· After reducing the pressure inside the test object, spray talcum powder with a nominal diameter of 50um for 2 hours at 40-60meters/hour inside the dust chamber. · IEC60529
High-pressure, High-temperature Wash-down Test (IPX7)	· Test ingress by putting the object under 1000mm water with 2bar of pressure for 30 mins
High-pressure, High-temperature Wash-down Test (IP69K)	· Spray nozzle provides 80°C water with pressure of 80-100 bar and a flow rate of 14-16 L/min to the object · Distance between spray nozzle and the test object: 10-15cm · Water spray angle: 0°, 30°, 60°, 90° · The nozzle is held at 4 of each angle for 30 seconds · DIN 40050 PART9

QML-150 / QML-250

- Equipped anti-glare filter
- Suitable for environments that require stable intensity illumination for improved visibility

QML-150-D

QML-250-D

Cautions in use

- Please check the safety manual before use, accidents such as fire or electric shock can occur if the safety manual is not followed.
- This product can be changed without any notification. Latest information is on the website.

QFL / QFLC

PRODUCT SPECIFICATION

QFL | QFLC

Materials Lens-PC, Side cover-Al, Heatsink-Al, Bracket-SPC-1

Ambient operating temperature -30°C to +50°C

Protection rating IP67

Certificates CE

QFL Translucent lens
QFLC Transparent lens

- Excellent front and side light distribution with the use of a special light distributing structure on the surface of the oval lens
- An external power supply is not needed for the AC type product; AC voltage can be applied directly to the product
- Excellent heat dissipation by using a heat dissipative material connected to the outer cover
- Water and vibration proof model (IP67), suitable for outdoors and places with dust and moisture
- Can select between QFL model(Anti-glare type) and QFLC model(High luminance type) depending on your work conditions
- Tilt bracket provides wide luminance angle adjustment of 130°
- Superior durability with lens made of polycarbonate
- Wired type and M12 connector type allow for a customized model that M12 connector can be attached at the end of wires.

QMFLN / QMFHLN

Suitable for machine tool equipment that needs excellent water and oil proof features

PRODUCT SPECIFICATION

QMFLN | QMFHLN

Materials Housing-Al, Lens-Tempered glass
Bracket-SPC-1

Ambient operating temperature -30°C to +60°C

Protection rating IP67, IP69K

Certificates CE, UL

QMFLN / QMFHLN

- Special sealing structure provides excellent oil resistance, suitable for environments with high temperature cutting oil
- Suitable for high pressure and high temperature water cleaning environments(IP69K)
- Tempered glass prevents damage from machine tool chips
- Bracket included has tilt adjustment with angle of 120°
- Can select from variety of body length of 200/ 300/ 400/ 500/ 600mm to fit your application needs
- Can choose anti-glare lens type depending on work environment needs
- High-intensity type available upon request(Model number: QMFHLN)
- Wired type and M12 connector type allow for a customized model that M12 connector can be attached at the end of wires.

Structural Features

Special sealing structure features superior oil resistance

Prevents components from moving in the sealed body due to warpage from high temperature over a period of time

Chemically Tempered Glass

Prevents shock damage from machine tool chips

Special Micro Lens

Provides high luminance with superior light focusing capability, suitable for work environments that need long distance direct visibility

Aluminum Heat-Radiant Housing

Adopted special heat-radiant structure to provide stable luminance in high temperature sealed environment

Tilt Type K Bracket

The standard bracket included enables tilt adjustment with angle of 120°

M12 connector equipped

Protection rating IP67, IP69K

Certificates CE, UL

QCML Translucent lens

QCMLC Transparent lens

- Side cover and lens is integrated together with a multi silicon rubber sealing structure for superior protection from water
- Aesthetically pleasing with slim and compact housing
- Polycarbonate material provides superior heat and shock resistance
- Features great seal and durability in food processing, pharmaceutical, and beverage processing machine that needs high temperature wash down
- Can select from light colors of Cooldaylight, warm white, amber and red color lights depending on your application needs such as semiconductor manufacturing equipment, machine tools and test equipment
- Can select between transparent lens type and translucent lens type depending on your application needs
- Detachable mounting bracket structure enables to adjust mounting hole space freely
- Protection rating: IP67, IP69K
- Standard entry cable included. Can customize the product with the M12 connector if requested(Female M12 connector is not provided)

Waterproof LED Light Bars for Multi-use with Protection of IP67/IP69K

QCML-7C

Waterproof LED light bar with 7 color configurations

PRODUCT SPECIFICATION

QCML-7C

Materials Lens-PC, Side cover-PC, Heatsink-Al, Bracket-PC

Ambient operating temperature -20°C to +50°C

Protection rating IP67/IP69K

Certificates CE, UL

- Save installation cost and space by utilizing this single LED light bar with 7 configurable colors
- Side cover and lens are integrated together with a multi silicon rubber sealing structure for superior protection from water
- Aesthetically pleasing with slim and compact housing
- Polycarbonate material provides superior heat and shock resistance
- Features great seal and durability in food processing, pharmaceutical, and beverage processing machine that needs high temperature wash down
- Detachable mounting bracket structure enables to adjust mounting hole space freely
- Protection rating: IP67, IP69K
- Standard entry cable included. Can customize the product with the M12 connector if requested(Female M12 connector is not provided)

QGL / QGLC

General lights for built-in AC power converter in compact structure

PRODUCT SPECIFICATION

QGL | QGLC

Materials Lens-PC, Side cover-ABS, Heatsink-Al, Bracket-STS201

Ambient operating temperature -30°C to +50°C

Certificates CE

QGL Translucent lens
QGLC Transparent lens

- Using aluminum base that protects against heat and stable illumination
- Suitable alternative to fluorescent lighting for situations that require a compact structure with high illumination
- LED direct AC connect system, no need other power device
- 4 kinds of products length 200/300/400/500mm
- Lens options available based on use case- Transparent lens(QGLC) or translucent lens(QGL)
- Removable mount bracket where mounting distance can be adjusted
- Standard entry cable included. Can customize the product with the M12 connector if requested(Female M12 connector is not provided)

1,800Lux (with 45 degree lens-customization)

Compliant with RoHS directive

- Gooseneck light with 360-degree omnidirectional illumination
- Intensive illumination allows for a visibility in a dark area
- Condensing lens or diffusion lens type are possible to be provided as control parts and light source parts are separated(diffusion lens type is optionally provided)
- Robust waterproof sealing realizes stable operation in a harsh environment
- Minimize the size of the light source by separating the control and light sources
- ON/OFF switch is optionally provided

QML60 Flexible Gooseneck LED Work Lights

Optics Specifications	
Model number	QML60
Lens color	Transparent
Light color	Cooldaylight
Color temperature	5,300-6,100K
Luminous flux	500lm
Illumination(at 1m)	3,900Lux(with 25 degree lens), 1,800Lux (with 45 degree lens-customization)
Specifications	
Model number	QML60
Voltage	DC24V
Range for operation voltage	DC21V-DC30V
Power consumption	6.5W
Insulation resistance	Min. 100MΩ(500V DC mega ohm meter)
Withstanding voltage	DC: 500V AC, 60Hz, 1minute
Operating temperature	-30°C to +60°C
Protection rating	IP65
Materials	Housing-Al(DEICASTING), Lens-PC
Certifications	CE
Weight(Approx.)	0.87Kg

Technical Diagram Units: mm

QWL20 / QWL20-DT

QWL20 / QWL20-DT

PRODUCT SPECIFICATION

QWL20

Materials Housing-Al, Lens-PC, Bracket-STSS

Ambient operating temperature -40°C to +75°C

Protection rating IP67

Certificates CE, UL

- Water / Dust proof LED work light that resists against severe storm and heavily dusty environment
- IP67 protection rating, waterproof & dust resistant model that can be used where dusty and flooded area
- Polycarbonate lens allows excellent vibration and impact resistance.
- Long lifetime with a high intensity LED light source allows for easy maintenance
- Features excellent durability in construction environment with heavy machineries such as excavators, cranes, off-road vehicles

QWL20 / QWL20-DT Water and Dust proof LED Work Lights

QLS-SLM-250

PRODUCT SPECIFICATION

QLS-SLM-250

Materials Side cover-PC Lens-PC, Bracket-Al**Ambient operating temperature** $-40^{\circ}\text{C} \leq T_{\text{amb}} \leq +60^{\circ}\text{C}$ **Protection rating** Non Water-Proof**Certificates** CE, UL

- Control cabinet, machinery inside light and work light purpose
- Slim and compact structure realize aesthetically pleasing design
- Long product lifetime with the application of a high intensity LED light source
- 360-degree rotational mounting bracket realizes light emit angle can be adjusted
- Excellent visibility by a structure with direct distributes LED light to user direction
- No external ground wire is necessary as it is inside of the unit already

QLEX-SLM-650-EMG

- AC powered type LED light that is operated by battery in case of abrupt power outage or emergency
- Rated AC power turns on Lighting as well as battery charging for emergency
- Explosion proof LED lighting luminaires designed for use in explosive gas environments with Ex d IIC rating
- Features special structure that allows to adjust light angle by turning the light tube
- Fully enclosed structure allows outdoor application as it provides protection against dirt and water
- Excellent visibility by emitting the LED light directly into user's eyesight
- Emergency battery hours: Max. 2.0HR (Battery capacity: 2,700mAh)
- Battery charge time: Min. 12.5hours (discharge to full charge, based on 25°C)
